

Vacancy in the pathology department of the Cliniques Universitaires Saint Luc in Brussels (starting January 2023)

There is an open position for an experienced pathologist or expert in hemato-pathology combined with ORL or bilio pancreatic pathology.

The pathologist will work with another colleague involved part-time in hematopathology and will be also responsible for hepato-bilio-pancreatic pathology or ORL pathology. She/he will work closely with the clinical team. She/he will have the opportunity to be involved in ongoing research projects in these field ; there is also the possibility to start a research project in this field (PhD).

General presentation

This university hospital department located in Brussels consists of 12 permanent senior pathologists and 8 residents in training. The department activity is organised in subspecialties; each pathologist is in charge of a specific subspecialty and participates in the activity of one other subspecialty to ensure continuity. The pathologist will participate in multidisciplinary team meetings of the correspondent fields. The opportunity to participate in the teaching of medical students can be offered.

Additional expertise in gastrointestinal pathology or in ORL pathology is an advantage.

The department has a large immunohistochemistry portfolio with more than 200 antibodies and provides FISH/SISH analysis. We collaborate closely with the molecular biology platform for molecular tumour analysis (NGS, RNASeq, ...). The activities of the department are accredited according to the ISO-15189 standard.
